Professional Summary

Final-year bachelor's student in Information Management with hands-on experience in Python, PHP, Flutter, and full-stack development. Built and deployed practical projects including a real-time Nepali ANPR system using YOLOv8 and EasyOCR, and an AI-powered travel platform with a Retrieval-Augmented Generation (RAG) chatbot. Familiar with AI/ML fundamentals, data handling, and modern application development. Seeking opportunities in software engineering and AI-focused roles to apply technical skills in building scalable and impactful systems

Education

Tribhuvan University

Bachelor in Information Management

2022 – Expected 2026

NCCS Secondary School

Computer Science (High School)

2020 –2022

Technical Skills

- **Programming Languages:** Python, Java, JavaScript, Dart (Flutter)
 - **Web & Mobile Technologies:** PHP, HTML5, CSS3, JavaScript, TailwindCSS, Bootstrap, Flutter
 - **Databases / Frameworks:** MySQL, Supabase, Bootstrap, TailwindCSS
 - **AI / Machine Learning & Computer Vision:** YOLOv8, OpenCV, EasyOCR, RAG, Prompt Engineering
 - **Tools & Platforms:** Git, GitHub
-

Projects

1. Automatic Number Plate Recognition System

- **Technologies:** Python, YOLOv8, Custom CNN, OpenCV, EasyOCR
- **Description:** Developed a real-time Automatic Number Plate Recognition system for Nepali license plates using YOLOv8 for detection and a Custom CNN with Devanagari support for character recognition, capable of processing both video streams and live camera feeds.

2. AI-Powered Travel Platform

- **Technologies:** PHP, Bootstrap, HTML, MySQL
 - **Description:** Engineered a scalable travel booking platform allowing users full CRUD control over bookings and destination data, ensuring efficient data handling, responsive UI and integrated with a Retrieval-Augmented Generation (RAG) chatbot for intelligent travel recommendations and contextual responses.
-

Certification

Building with the Claude API – Anthropic Academy

Covered Claude API integration, prompt engineering, RAG, MCP, tool use, and AI agents.
